

Dear Valuable Customers,

## *JP5 Two-Hands Switches series has been launched!!*

Comprehensive stand-alone servo press is designed especially for cell production and research facilities, the result display, control mechanism, pressing mechanism, C-frame and pair of operation switches are all included in one machine.

*Just turn on the power and you are ready to begin!*

Currently available with models in table below, and with even greater speed and interface functionality than its predecessor, the JP4 Series, the electrically-powered JP5T Series runs cleaner and quieter than pneumatic and hydraulic presses, while consuming 75~80% less power.

The JP5T features interactive, user-friendly programming, multiple pressing modes, automatic amp adjustment and load calibration as well as a variety of sensor capabilities.

Add our optional dedicated PC software and add powerful data acquisition analysis and reporting capabilities.

A clean room compatible model is also available (Class ISO4).

### Currently available models :

Model	Max. Force	Stroke Length
JPT-0055	0.5kN	80mm
JPT-0105	1kN	80mm
JPT-0205	2kN	80mm
JPT-0505	5kN	100mm
		150mm
JPT-1005	10kN	100mm
		150mm
JPT-1505	15kN	100mm
		150mm

\*Other models will be made available soon.
